

# STACK SPORTS LANUCH GAMEDAY EVENTS

The next gen Event management platform

Stack Sports (SportsTG), the leading provider of digital solutions to Event Providers, international, national, grassroots and professional sporting organisations across the globe has today announced the launch of GameDay Events.

GameDay Events is a completely new event registration, ticketing and admin solution for managing every event, from the smallest digital seminar to one-off club nights to the largest mass participation fun-run or city marathon. GameDay puts the event organiser in control and able to manage everything from branding and theming custom websites, the look and feel of online registration, through ticketing and running the event itself.

General Manager of Stack Sports said "We really love this new product and are excited to get it into the hands of our events partners and customers. GameDay Events complement perfectly our existing GameDay club and association membership and GameDay website solutions and we expect Events to be a great support, and cost saver, for event organisers as they re-establish the events programs in the coming year."

GameDay Events is free to use for free events, and comes with the lowest cost and most secure payments technology in the industry. With a clear range of price options, there are no hidden costs for organisers that choose to Events for their next big occasion, event businesses and sport associations just need to visit our website [mygameday.app](http://mygameday.app) to access GameDay Events.

Stack Sports (SportsTG) has been providing next generation technology solutions to sports since 2001 across Australia, New Zealand APAC and EMEA. We support secure affordable and full featured membership, competition, event and ticketing solutions and related website, engagement, e-commerce and fundraising solutions to sports communities worldwide.
