

# Stylish and Sustainable Custom Timber Furniture For Your Home

## Exciting Additions to One Tree Studio's Signature Collection

Style and sustainability are brought together in the stunning updated Signature Collection by One Tree Studio. You will adore the simple elegance the timber furniture designs bring to your home, knowing they have been thoughtfully planned and skillfully crafted, while minimising the impact on our planet.

Husband and wife team Mike and Susan Stanger, from One Tree Studio, present their updated Signature Collection. One Tree Studio specialises in creating beautiful spaces in your home with quality custom furniture and homewares, handcrafted from sustainably sourced timbers.

The Signature Collection range of furniture and vanities is designed to showcase the beauty and individuality of the timber, while emphasising quality craftsmanship and design. Products can be customised by choosing from a range of sizes and sustainably sourced timbers, so you feel that each piece was created specifically to meet your lifestyle needs.

As the environment is important to Mike and Susan, they ensure that each piece of furniture created in their studio gives back more than it takes. The Signature Collection is no different. For every \$100 spent on a product 1 tree is planted along their rainforest restoration corridor on Moggill Creek in Brookfield (hence the business name One Tree Studio). One Tree Studio furniture is a beautiful and sustainable way to furnish your home.

This collection is exclusively sold through One Tree Studio with each product being individually made to order in their Brookfield woodworking studio.

The new Signature Collection will be released on 22 February 2021.
