

Thycotic Publishes Free, Comprehensive 36-Page Guide Covering the People, Process and Technology Needed to Implement PAM Program

Expert's Guide to Privileged Access Management Success Details Strategies for Any Level

ADELAIDE, Australia, June 14, 2019 -- Thycotic, a provider of privileged access management (PAM) solutions to 10,000 organisations worldwide, today announced the availability of a new eBook aimed at accelerating an organisation's PAM security efforts beyond the basics. Compiled by Thycotic experts and featuring real life examples from organisations of all sizes, the "Expert's Guide to Privileged Access Management Success" encompasses key topics such as: defining advanced PAM, establishing stakeholder roles and responsibilities, understanding the PAM lifecycle approach, and implementing and integrating PAM technology. "We've had several requests from our enterprise customers and prospects to share what we've learned about successful PAM implementations over more than a decade of innovation in developing PAM solutions," said Thycotic Chief Marketing Officer Steve Kahan. "Unlike other eBooks on PAM, this guide gives proper weight and value to the people and process that must be part of any successful technology implementation." The eBook provides tables of actionable guidance with prescriptive technical recommendations for PAM experts. Recommendations include controls for policy and governance, discovery and automation, access security, session protection, audit and monitoring, behavioral analytics, and event response and recovery. The Expert's Guide to PAM Success also devotes an entire section to integrating PAM controls with other IT and security solutions. With tight integration, information stays up to date, reports take less time to create, and decisions can be made more quickly. Integrations discussed in the guide include PAM and IAM/IGA, Active Directory, IT Service Management, Vulnerability Scanning, Threat Analytics, SIEM and DevOps Tools. To get a complimentary copy of the Expert's Guide to PAM Success, please visit <https://thycotic.com/resources/experts-guide-to-advanced-pam-success/>. For more information about Thycotic and its solutions, visit <https://www.thycotic.com/>. About Thycotic Thycotic is the leading provider of cloud-ready privilege management solutions. Thycotic's security tools empower over 10,000 organisations, from small businesses to the Fortune 500, to limit privileged account risk, implement least privilege policies, control applications, and demonstrate compliance. Thycotic makes enterprise-level privilege management accessible for everyone by eliminating dependency on overly complex security tools and prioritising productivity, flexibility and control. Headquartered in Washington, DC, Thycotic operates worldwide with offices in the UK and Australia.
