Many musicians don't understand the full extent of how a guitar pedal can positively affect their creativity. Tone Soup features Gamechanger audio pedals for overdrive and distortion. The Gamechanger Audio Plasma Coil is a specialised version that takes distortion to extreme heights by amplifying audio signals to 3500 volts through six different special effects. Guitarists can boost or cut high and low frequencies for versatility and the signal is 100 percent Plasma.

Guitarists of all levels of experience know the importance of acquiring the right equipment. Guitar accessories Australia at Tone Soup encompass hard working boutique guitar effects pedals, first class power supplies, multi-switches and mini amps. One example of amps stocked is the Hotone Nano Legacy Vulcan Five-O amp for capturing the "brown metal" sound prevalent in legendary heavy metal records. An added bonus is its compact size and portability.

Music has the ability to elicit a full range of emotions in listeners. Guitar pedals Australia can expand that potential, enabling musicians to express themselves through guitar pedals such as the Anasounds Spinner Expression pedal, a creative solution that makes the tremolo effect far more exciting. The spinner was inspired by a skateboard screw and originally built by a French craftsman. The Spinner Expression setup eliminates knobs that can cause accidents.

Tone Soup features a multitude of essential guitar pedals and supplies designed to enhance music in any genre.
