

## Top of the Game: Red Porous Crushed Brick

Ecogroup, Australia's leading supplier of products that reduce waste within the landscaping industry, has just launched red porous crushed brick for tennis courts and baseball fields.

The red porous crushed brick, or red brick dust, is crushed to 2.5mm and ideal for surfacing clay tennis courts and baseball triangles. Crushed from pure red recycled brick, our red porous crushed brick is a great sustainable surface option for sports fans and club owners.

Red porous crushed brick is available in 25kg, 1m<sup>3</sup> bulka bags or loose by the cubic metre.

Distributed in Victoria by ET Richards & Sons, a third generation tennis court construction company, red porous crushed brick can be delivered to Melbourne and surrounding suburbs.

Ecogroup also has a number of other environmentally friendly services and products available including asbestos removal, demolition, excavation, bin hire, recycled bricks and pavers, mulch, crushed brick, briquettes and roof tiles.
