

Tough Corp announces full Wireless LAN Design, Installation, and Management capability

Sydney, Australia – October 18, 2011

Tough Corp today announces that due to the recent addition of Sales and Technical qualified staff in the design, installation and management of Wireless LANs, we are now able to offer complete solutions for Wireless Networking. An integral part of the design of the Wireless LAN is the Wireless LAN Site Survey. Tough Corp is now able to provide detailed Site Surveys in both the 2.4GHz and the 5GHz frequency bands using the latest Site Survey software and hardware tools. A detailed written report outlining requirements and recommendations is provided after the completion of the survey. An invaluable additional use of our Site Survey tools is their capability of fault diagnosis of Wireless LANs. This is aided by the use of our Spectrum Analyser which scans the Wireless LAN spectrum looking for sources of noise and interference. "I take great pleasure in announcing the addition of the new capability of Wireless LAN Design, Installation and Management to Tough Corp's portfolio. This addition closes the gap that we had in our portfolio and allows for the complete hardware solution for mobile computing in the Wireless LAN environment," said Don Fredric, Tough Corp's Product Manager. Tough Corp will be targeting organisations such as clubs, hotels, department stores, mining sites, warehouses, logistics and distribution centres to assist them with their wireless infrastructure requirements and provide wireless site survey's in order to maximise their wireless capabilities. Tough Corp is proud to partner with Getac, Honeywell, Zebra Technologies, Datamax - O'Neil, DLI, Ricoh, Contour, iKey, RAM Mounts, Zirkona, ESRI Australia and Garmin. Tough Corp is a leading provider of rugged laptops, rugged tablets and rugged PDA's and are well placed to service all rugged mobile printing and mobility requirements no matter how tough the environment. For more information on Tough Corp or our Wireless LAN capability, please contact Tough Corp's website at www.toughcorp.com or call us toll free on 1300 558 474.
