Two Kinds Of Investors. Which One Are You?

Broadly speaking, there are two kinds of investors.

One is the rare kind –very rare— He makes money in the stock market week after week... month after month... year after year. In UP or DOWN markets.

He doesn't follow the crowd. He follows a system and tools that works. He uses TOOLS that give him accurate, useful information on the market. He invests with a quiet confidence.

He doesn't listen to "hot tips" from cab drivers or the analysts and talking heads on CNBC, CNN, FOX NEWS, Bloomberg or so called Gurus who claim to travel the world or space.

And he definitely doesn't trust his retirement and investment plans to a fund "manager." He knows better. He looks forward to retirement because his portfolio is always growing.

THE OTHER KIND

The other kind is the investor who operates off of hunches, guesswork or intuition. He doesn't know what else to do. He's fearful and hopes that so-called "professionals" and advisors will look out for his interests. Purchases programs on hype, speculation and big return figures.

This is the person who makes money accidentally, when things are good. This is the person who just hates the stock market but doesn't know what else to do. This is the person who gets scalped in the market on a regular basis.

Hello. My name is George Fokas. I recently created Fokas Beyond because of lies and deceptions in the industry about Share Renting or Renting Shares along with people on stage presenting information that is false. I know you can become a successful investor like the rare bird mentioned above. When I was involved with these so called companies who were presenting a product or products about stock market education, I learnt that many are out for one thing, your money and will do whatever to get it. This is why I decided to launch Fokas Beyond, looking beyond the lies and deceptions and put my time, knowledge and integrity into a company that will do the right thing for the students. A Faster, Smarter, Better way to find winners and avoid the losers. After 11 years of real world success, I can tell you that, nothing else even comes close.

I'm here to tell you, that you don't have to be like the guy who gets scalped in the market on a regular basis or the one listening to all the hype with lies and deception. You can be like the first kind of investor I mentioned... the kind who makes money in any market. I'm here to tell you the market will reveal itself to you every day. All you need are the right answers at the right time. The market is nothing more than math. And math does not lie.

If the math "adds up"... you can confidently make a move. If the math does not "add up" you sit it out. You wait until the math tells you to jump in or out. It's that simple.

Now you can have the right information you want when you want it...That leads to profits!

END MONEY WORRIES FOR GOOD

Think about this. If you follow the simple investing plan based on the TOOLS we provide you at Fokas Beyond you can potentially end your money worries for good.

You can become the confident investor who makes money month after month, year after year... The one with the bright and happy future. The one who sleeps well at night.

I began in 1999 and learnt the hard way about what to invest and when to invest. At that time, I developed the right mindset, approach and knowledge that many of my students around the world now model. Given this information your investment success is bound to improve. My name is now used by companies to try and build their reputation on the back of my hard work and personal success. Beware of Imitators making these claims. Fokas Beyond is th
