

VRG Joins M-Files Global Partner Program

Singapore-based life sciences technology solutions provider adds the M-Files intelligent information management solution to its portfolio

Singapore - 4 December 2019: VRG, a Singapore-based e-Regulatory technology, consultancy and services provider for the Life Sciences industry, today announced that it has joined the global partner program of M-Files Corporation, the intelligent information management company.

VRG's core competencies are Enterprise Content Management, e-Regulatory systems and Regulatory Operations. Its focus is the Asia-Pacific region. They will leverage M-Files intelligent information management to help APAC customers modernize their information management practices. By transitioning from managing content and information using archaic, network folder-based approaches to a contextual, AI-enhanced and repository-neutral paradigm, these businesses can improve efficiency and workflow, eliminate information silos, maximize information reuse and avoid redundancy, conflicts and data loss.

"Our customers have unique content management needs. The repository-neutral and metadata-driven approach of M-Files will help our customers unify information across the enterprise based on context. Additionally, M-Files is exceptionally well-suited to address the compliance and infrastructure change management requirements that characterize the Life Sciences industry," said Eric W Vestal, Founder and CEO of VRG. "The configurability and workflow capabilities of M-Files, coupled with its intuitive and user-friendly interface allows our customers to address challenges fast, without disturbing existing processes and to enjoy high adoption rates among their staff."

"We are pleased to partner with VRG to help Life Sciences organizations undergo strategic transformations and build new business models that allow them to scale and deliver greater value to their customers," said Johanna Juhola, Channel Account Manager at M-Files. "M-Files solutions enable Life Sciences organizations to automate and track processes, ensure consistent product quality and reduce regulatory risk."

About VRG

VRG Pte. Ltd. (VRG) is a consultancy providing services and technology-enabled solutions for the Life Sciences and Engineering. Headquartered out of Singapore, their mission is to assist Life Sciences and Engineering companies of APAC in integrating enabling technologies through client-oriented services while maintaining a sensitivity for the costs of change. VRG's alliance consulting model provides highly experienced, industry recognized experts with deep subject matter expertise in science, engineering and technology with business know-how and client-oriented mindsets to support each client engagement. VRG's core services include Content Management, Regulatory Operations and Regulatory Submission Management, Regulatory Affairs, Regulatory Project Management, and e-Regulatory solutions (systems integration, including cloud technology). VRG has established partnerships with six global or regional technology and consulting leaders. For more information on VRG visit vrg.com.sg

About M-Files and the M-Files Partner Program

M-Files provides a next generation intelligent information management platform that improves business performance by helping people find and use information more effectively. Unlike traditional enterprise content management (ECM) systems or content services platforms, M-Files unifies systems, data and content across the organization without disturbing existing systems and processes or requiring data migration. Thousands of organizations in over 100 countries use M-Files for managing their business information and processes, including SAS Institute, OMV, Valmet, Rovio, Thyssenkrupp and NBC Universal. For more information, visit www.m-files.com.

M-Files provides a broad spectrum of business opportunities for value-added resellers (VARs), systems integrators and consulting services companies in a variety of industries and market segments. The company is committed to providing its partners with the resources and support needed to drive new license and subscription renewal revenue, as well as deployment and integration services to maximize profitability, develop expertise and build stronger customer relationships.
