

## WINDANSEA SURF CLUB – CUSTOM LASERCUT TROPHIES

We love getting creative with our projects, so when the Windansea Surf Club asked us to create a new trophy for them we were excited to come up with something special for them. When drafting this up we wanted to make some beautiful Custom Lasercut Trophies that captured the feeling of the glassy ocean. We love the colours that the custom coloured acrylic produces when the light hits it, it really seems to illuminate; really bringing the visual characteristics of the ocean to the finished product. The layers of acrylic add a nice depth to trophy and also give a nice weight (always nice to hold something of substance). Overall we are proud to tell people that these were designed, constructed, and finished; all on site by our team.
