

## Xplore's Android™ Rugged Tablets Driving Warehouse Management and Inventory Operations for One of World's Top Dietary Supplement Companies

SYDNEY, Australia, Nov. 3, 2017 -- Xplore Technologies Corp. (NASDAQ:XPLR) today announced that a global dietary supplement manufacturer has started upgrading its forklift mobility solutions to the Xplore XSLATE D10 fully rugged Android™ tablet. The 10.1" Intel®-powered, forklift-mounted mobile computers now serve as the primary information source for a number of warehouse management workflows, including inventory picking. Additional XSLATE D10 orders are anticipated as the manufacturer continues to upgrade its mobile technology in other production and warehousing facilities. "This health and wellness industry leader understands the value that tablet computers bring to their operations, but they have learned over the last several years that they really need the security and performance of a professional-grade mobility solution," explained Brett Gross, ANZ Director of Xplore. "That is why they decided to transition away from their previous Windows Mobile tablets, and why iPads were not considered a viable option within their factories or warehouses." As this customer started evaluating its options, they quickly realized that the Xplore XSLATE D10 was the ideal solution. The latest generation of the forklift-mountable IP65 tablet runs Android 6.0.1, Marshmallow, which supports encryption at the operating system (OS) level – a strict requirement of their parent pharmaceutical company. ### About Xplore Technologies

Xplore is The Rugged Tablet Authority™, exclusively manufacturing powerful, long-lasting, and customer-defined rugged tablet PCs since 1996. Today, Xplore offers the broadest portfolio of genuinely rugged tablets – and the most complete lineup of rugged tablet accessories – on Earth. Its mobility solutions are purpose-built for the energy, utilities, telecommunications, military and defense, manufacturing, distribution, public safety, healthcare, government, and field service sectors. The company's award-winning military-grade computers are also among the most powerful and longest lasting in their class, built to withstand nearly any hazardous condition or environmental extreme for years without fail. Visit [www.xploretch.com](http://www.xploretch.com) for more information on how Xplore and its global channel partners engineer complete mobility solutions to meet specialized workflow demands. Follow us on Twitter, Facebook, LinkedIn, and YouTube.

### Forward-Looking Statements

This news release contains forward-looking statements that involve risks and uncertainties, which may cause actual results to differ materially from the statements made. When used in this document, the words "may", "would", "could", "will", "intend", "plan", "anticipate", "believe", "estimate", "expect" and similar expressions are intended to identify forward-looking statements. Such statements reflect Xplore's current views with respect to future events and are subject to such risks and uncertainties. Many factors could cause actual results to differ materially from the statements made including those factors detailed from time to time in filings made by Xplore with securities regulatory authorities. Should one or more of these risks or uncertainties materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described herein as intended, planned, anticipated or expected. Xplore does not intend and does not assume any obligation to update these forward-looking statements.
