

Xplore Wins Best PC Client Platform at Intel Technology Partner Awards

SYDNEY, Australia, March 29, 2018 -- Xplore Technologies Corp. (NASDAQ:XPLR) today announced that it received the Intel® Technology Partner award for Best PC Client Platform. Xplore was honored for its design, engineering and widespread industry application of the Xplore XSLATE R12 rugged tablet PC that uses Intel technologies. The award was presented at the 2018 Intel Partner Connect conference in Washington, D.C.

The Xplore XSLATE R12 is the highest performance rugged tablet on the market, delivering performance gains that improve the productivity of field, industrial, and public safety workers. It is the first rugged tablet to integrate Intel® PCIe Solid State Drives (SSD) as a standard feature on the 256GB, 512GB and 1TB configurations. The resulting boost in speed, power and storage capacity practically eliminated user downtime by enabling dramatically faster device startup, application load time and file transfers than any competing tablet or 2-in-1. For users that require data-heavy applications or need additional storage for large files, the XSLATE R12 is also available with a high capacity 1TB PCIe SSD for ultra-fast performance.

"Xplore is deeply committed to bringing the latest technology and innovation to its rugged mobility customers and giving them an even more impressive return on investment," said John Graff, Vice President of Marketing at Xplore. "That is why Xplore works with Intel to take dramatic engineering leaps. We want to accommodate every one of the durability, performance, security, safety, connectivity and usability requirements needed to power a mobile workforce without requiring organizations to give up any aspect of the desktop experience."

"Intel appreciates the work that Xplore has done in finding new and innovative ways to use Intel technology to bring exciting new capabilities and performance to the PC platform," said Jason Kimrey, General Manager, U.S. Channel Scale and Partners at Intel. "We congratulate them on their successes and look forward to our continued collaboration."
