

## YOU'RE INVITED - Launch of New Generation Renewable Energy Home Battery by SENEK

*Strategy.  
Action.  
Results.*

Australians have been waiting too long for a good reason to install a battery to store energy provided by our giving sun and PV solar panels. Among many of the disadvantages in the past have been: their inferior quality; the warranty of only 10 years; the weight of more than 200kg that makes it very difficult to hang on a wall; the waiting time to actually get one; the hefty installation cost; and all the extra add-ons such as safety features that really should be part of the unit cost. Well, hold on to your seats because a unique new battery is being launched at All-Energy\* that will set the benchmark from which other batteries will follow. Please join SENEK GmbH's Managing Director from Germany, Jaron Schachter, who will unveil its new-generation SENEK.Home V3 Hybrid battery at 10.30am on Wednesday, 23 October. Think double the warranty, half the weight, AC & DC coupled, instant savings of \$4,000, German-designed and built quality, 97% efficiency and MUCH more. Please come to Stand No K119 to see and hear for yourself. You'll find out why SENEK is a multi-award winner with more than 30,000 installations around the world. I look forward to seeing you there! \*All-Energy is being held at the MCEC (Melbourne Convention and Exhibition Centre), 1 Convention Centre Place, South Wharf. Use links on the images to register to attend this free event or go to: <https://www.all-energy.com.au/en-gb.html>
